HRF011

Company Wage Account

Many investigators (GPLA, auditors, etc.) demand total wage accounts so that taxes or balance sheets can be checked. This can, at present, only be achieved within the SAP Standard solution by modification or a customised program.

Solution Description

HRFORCE Company Wage Account now enables you to create a customer-specific Company Wage Account for freely selectable periods of time (e.g.: calendar year for GPLA auditors and/or fiscal year for business auditors) and dynamic sorting.

You can therefore display freely defined total wage types that may be traced as required using the corresponding individual wage types on the form. Groupings (summations for wage areas, business sectors, etc.) can also be created easily.

Implemented Functionalities

FREE PERIOD SELECTION

DYNAMIC GROUPING / SORTING / SUMMATION

ORGANISATIONAL GROUPING

WAGE TYPES BREAK-DOWN

TOTALS PAGE

PERSONAL PAGES INCL. HEADER DATA

Client Advantages

Field-tested solution

Easy to adjust to customer-specific needs

Different wage accounts possible

Branching to personal sheets possible

Exports to Excel and Word files

Output via ABAP List-Viewer
